## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8 and 29-36, drawn to an insulation system, classified in class 156, subclass 275.5.
- II. Claims 9-16, drawn to an oil field electric device, classified in class 174, subclass 120FP.
- III. Claims 17-28, drawn to a transformer, classified in class 336, subclass 206.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as an insulation system not use in the oil filed electric device of invention II or the transformer of invention III; invention II has separate utility such as the electric device not using the insulation system of I or transformer of III; invention III has separate utility such as the transformer not using the insulation system of invention I or the electric device of invention II. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2832

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
